For Immediate Release

Digital Watchdog® Increases Hard Drive Capacity for Blackjack® Servers

The Blackjack P-Rack™ and Blackjack Tower™ servers are now available with 16TB drives for more storage and a smaller carbon footprint by using fewer hard drives.

DW® Blackjack P-Rack and Tower servers.

Cerritos, CA (January 3, 2022) – Digital Watchdog® (DW), the industry leader in digital recorders, surveillance cameras, peripherals and related management software, announces the release of Blackjack server models with 16TB hard drives. These new models, available for P-Rack rackmount and Tower servers, are now available with Seagate® 16TB Exos™ drives for the highest rack space efficiency.

The Exos drives deliver the highest 16TB hard drive performance with enhanced caching, large data transfer with low latency and next-generation helium side-sealing weld technology for added handling robustness and leak protection. The new drives are equipped with digital sensors to ensure each drive is running at optimal performance.

The new 16TB Blackjack Tower server models are available in addition to the existing 10TB models. The 16TB P-Rack models will replace the current 10TB models. All new Blackjack servers come with DW Spectrum® IPVMS preloaded, are ready to order and are designed, assembled and inspected in our California facility. Each product undergoes multiple levels of quality control to guarantee the highest quality and performance.

Below is a comprehensive list of all new Blackjack models and total capacity:
